

NAME: MEET KALAL
SIR: MR. KAMLESH SHUKLA
SUBJECT: CYBER SECURITY

Assignment

module 4: Troubleshooting and Helpdesk

Section 1: Multiple Choice

1. What is the first step in the troubleshooting process?

- (a) Implementing a solution
- (b) Identifying the problem
- (c) Testing the solution
- (d) Documenting the solution

Ans: (b) Identifying the problem

2. Which of the following tools is commonly used to diagnose hardware issues by testing electrical connections?

- (a) Loopback plug
- (b) Toner probe
- (c) Multimeter
- (d) Cable tester

Ans: (c) Multimeter

3. Which Windows utility can be used to view system logs, monitor performance, and diagnose hardware and software issues?

- (a) Task Manager
- (b) Device Manager
- (c) Event Viewer

(d) Control Panel

Ans: (c) Event Viewer

Section 2: True or False

4. Safe Mode is a diagnostic mode in Windows that loads only essential system services and drivers, allowing users to troubleshoot and fix problems with the operating system.

Ans: True

5. A system restore point is a snapshot of the computer's system files, registry, and configuration settings at a specific point in time, which can be used to revert the system to a previous state if problems occur.

Ans: True

6. Ping is a command-line utility used to test network connectivity by sending ICMP echo requests to a target device and waiting for ICMP echo replies.

Ans: True

Section 3: Short Answer

7. Describe the steps involved in troubleshooting a computer that fails to boot into the operating system.

Ans: Steps to troubleshoot a computer that fails to boot:

1. Check power and cable connections.
2. Verify POST (look for beeps/lights).
3. Enter BIOS/UEFI → check boot order & drive detection.
4. Try booting into Safe Mode.
5. Use Windows Recovery (Startup Repair, System Restore, bootrec commands).
6. Test hardware (RAM, hard drive, disconnect peripherals).
7. Reinstall OS (last resort).

Section 4: Practical Application

8. Demonstrate how to troubleshoot network connectivity issues on a Windows computer using the ipconfig command.

Ans: Open CMD →

`ipconfig` (check IP) →

`ipconfig /release` →

`ipconfig /renew` (get new IP) →

`ipconfig /flushdns` (clear DNS) →

`ipconfig /all` (verify) →

`ping gateway / website` (test). ✓

Section 5: Essay

9. Discuss the importance of effective communication skills in a helpdesk or technical support role.

Ans: Importance of Effective Communication Skills in Helpdesk/Technical Support:

1. **Clear Problem Understanding** – Good communication helps technicians accurately gather details from users who may not be technical.
2. **User-Friendly Explanations** – Support staff must explain solutions in simple, non-technical language so users can understand.
3. **Building Trust & Confidence** – Polite, empathetic communication reassures users, even during stressful situations.
4. **Efficiency** – Clear instructions reduce misunderstandings, saving time in troubleshooting.
5. **Professionalism** – Good communication reflects positively on the organization's image and service quality.
6. **Team Collaboration** – Effective communication ensures smooth coordination with other support staff or higher-level technicians.
